EDUCATION

Binghamton University, State University of New York, Thomas J. Watson College of Engineering

Master of Science in Computer Science

GPA: 3.6/4.00

May 2023

Pune University, India

Bachelor of Engineering in Electronics and Telecommunication

GPA: 3.5/4.00

May 2017

SKILLS

Programming Languages: Java, JavaScript, Python, C, C++, HTML, CSS, XML

Database Systems: DB2, Oracle PL/SQL, MongoDB

Tools and Technologies: Linux, Windows, IDEs, Eclipse, Postman, JIRA, Selenium, Firebase, Confluence, Git, SDLC, Agile, Waterfall, REST API, Microsoft Office (Excel, Word, Project and PowerPoint), AWS Services (S3, Lambda, API Gateway, DynamoDB, etc)

Soft Skills: Cross-functional Collaboration, Problem Solving, Technical Communication

Analysis & Design: Requirements Gathering, Gap Analysis, Functional Design, Business Process Descriptions, Use Cases, Traceability

PROFESSIONAL EXPERIENCE

Application Specialist, Center for Disability Services | Cohoes, New York, United States

June 2025 - Present

- Performed application testing and supported system upgrades and deployments.
- Provided user support, resolved issues via ServiceDesk Plus, and delivered training.
- Collaborated with vendors to troubleshoot issues and coordinate solutions.
- Gathered requirements and ensured smooth Workday integrations with third-party systems.
- Conducted data analysis to support process improvements and system optimization.
- Maintained documentation and ensured compliance with security and operational standards.

Software Developer (ITS 2 Programming), NYS Office of ITS | Albany, New York, United States

Aug 2023 - July 2024

- Developed **Java** EE applications using Spring framework and custom frameworks for NYS Tax applications, leveraging JDBC, **JSP**, and **XML**.
- Utilized **DB2**, **Git**, WebSphere Application Server and other IBM development tools.
- Developed and executed **SQL** queries to seamlessly integrate with Java applications.
- Gathered and analyzed business requirements to design functional solutions for NYS Tax applications.
- Conducted **gap analysis** between existing system functionality and new requirements.
- Developed functional specifications for Java-based systems and ensured traceability through development and deployment.
- Collaborated with **cross-functional** teams to address system-level changes and deliver seamless integrations.

Teaching Instructor (Volunteer), Girls Who Code | Binghamton, New York, United States

Aug 2021- May 2023

- Organizing coding camp events and **Teaching** Over 50 Middle School Students Python development Class
- Plan and implement instruction that encompasses **learning strategies** or activities centered on STEM and programming specifics
- Encourage students to participate in coding competitions or elective courses when offered at the higher grade school levels

Software Engineer (Quality Analyst), Tejora Technologies | Mumbai, India

Dec 2020 - July 2021

- Implemented **Test Cases** for different workflows in the Insurance domain (ICICI Bank Client)
- Performed functional, **Regression**, and **Usability** testing for CRM Application
- Worked collaboratively with test teams during the product test and **UAT** phases to fix assigned bugs
- Strong Analytical and Problem-solving skills (**Troubleshooting**/debugging Software)

Software Developer (Internship), 90 Miles Straight | Mumbai, India

June 2020 - Nov 2020

- Played a key role in a software **startup**, contributing to the development and enhancement of innovative solutions.
- Implemented integration testing between Mobile (GPS Tracking) and Web (Supply Chain Management System).
- Enhanced and debugged website and mobile application UIs using **HTML5/CSS**, **JavaScript**, **XML**, and **Node.js**.
- Managed version control and progress tracking through **Git** (branching, merging, rebasing) and Confluence.
- Supported website deployment on **Google Firebase** (GCP) and resolved issues in the **Docker pipeline** (CI/CD) for Java applications.

Project Manager (Internship), Experience Commerce | Mumbai, India

Feb 2020 - May 2020

- Coordinate internal resources and **clients** for the flawless execution of multiple projects
- Conducted requirements elicitation and gap analysis to identify areas of improvement in project execution.
- Partnered with developers and QA teams to align project goals with functional designs.
- Used **SQL** and Advanced **Excel** for data analysis and reporting, supporting decision-making processes.

Software Developer (Jr Quality Analyst), Sociosquares | Mumbai, India

Dec 2017 - Jun 2019

- Wrote and executed **SQL** queries for test validation
- Designed, created, and implemented software test cases for Web, Android, and IOS applications.
- Experience in user interface testing using **HTML, CSS, Javascript**, WebElement
- Translated business requirements into test scenarios for web and mobile applications.
- Verified API functionality through **Postman** and ensured compliance with technical specifications.
- Supported cross-functional teams in troubleshooting and debugging.

PROJECTS

Photo ID Validator AWS Architecture | Binghamton, NY

May 2023

- Built a Full Stack Photo ID Validator app to verify if a picture uploaded by the user is valid for a Photo ID or not.
- Used S3 Bucket to host the AWS application and **React JS**, HTML/CSS to build frontend
- Used Python with Lambda function, API Gateway, and **AWS Rekognition** to build REST API for picture validation
- Created Tables in **DynamoDB** to store pictures uploaded by the user

Social Media Data Science Pipeline | Binghamton, NY

Nov 2022

- Built a Full Stack interactive dashboard to visualize tweets, and comments about abortion and it's effect on elections.
- Used **Python** for fetching data from social media sites such as Twitter, Reddit and YouTube APIs.
- Used **MongoDB** to store comments and **Flask** to develop the interactive dashboard.
- Performed analysis on the comments to get relevant data about the affect of abortion on elections.

Student Registration System | Binghamton, NY

May 2022

- Built database architecture to support a typical Student Registration System in a university
- Used Oracle's **PL/SQL** and JDBC for the database system
- Created several procedures inside a package in order to manipulate the data according to the required functionality.
- Implemented triggers in order to keep a check on any inserts/ deletes and updates of the tables

Topic Modeling | Binghamton, NY

Dec 2021

- Implemented Topic Modeling to find the important topics from documents and Tweets
- Used **LDA**, **ProdLDA**, and **TOP2VEC** Statistical modeling to extract topics from documents.
- Implemented Twitter API in all models to discover the top Topics of real time Tweets.
- Visualize the Word Clouds for all models in **Python**

OTHER PROFESSIONAL EXPERIENCE

Part Time Worker, Chartwells | Albany, NY

2025

- Assisted in curating coffee drinks.
- Provided friendly and professional customer service by actively listening to customer preferences and offering tailored recommendations.
- Communicated effectively with team members to coordinate orders and maintain smooth workflow during busy hours.
- Resolved customer concerns promptly and professionally, ensuring a positive experience and repeat business.

Student Worker, Sodexo | Binghamton, NY

2021- 2023

- Work in the food service operation, handling credit transactions from Sodexo and client customers.
- Assist in setup and serving of food from counters and steam-tables,
- Provide support to the retail operation, including setup, maintaining supplies and products, and assisting in cleanup and close-down.
